EVOS[®] WRIST
Plating System

Supporting healthcare professionals

Wrist fractures are complicated enough. Why be limited by your system?

EVOS[®] WRIST Plating System offers:

- Flexibility to choose between stainless and titanium volar options
- Plates and screws designed to ensure low-profile constructs whether screws are on or up to 15° off-axis
- Plating options that considers all distal radius and distal ulna fracture needs
- Titanium dorsal and Stainless steel forearm options

Expansive plating system

Seamless compatibility

EVOS® WRIST Titanium and VLP Mini Mod have you covered from forearm to finger tip.
– Compatible screws, drills, and drivers between systems.

EVOS® WRIST Stainless and EVOS® MINI offer stainless options for forearm, wrist, and hand fixation.
– Compatible screws, drills, and drivers between systems.

Advanced technology to handle simple to complex wrist fractures

Titanium Screws

1.8mm		2.4mm		3.5mm	
Locking Peg		Cortex	Locking	Cortex	Locking
					

Stainless Steel Screws

1.8mm		2.4mm		3.5mm	
Locking Peg		Cortex	Locking	Cortex	Locking
					

Variable-angle locking technology
